Fast delivery time

Can be handled by one person

No items weigh more than 12 kg

Low weight with high stability

Mobile or stationary use

The modules can be combined

Individually configured quality solutions of flexible exhibition, bar and catering systems

G-Rack bars are created with carefully thought out constructions and made from robust lightweight aluminum frames. Regardless of whether you have to hold a trade fair, a customer event or a promotional event, G-Rack ensures that you stand out with a premium setup.

We attach great importance to efficient work, which means that our system parts are easy to handle, transport and set up. You can easily carry and set them up by yourself. With our various design options, you can customize the practical modules with custom branding, different colors and surface materials to give them a unique look.

Our lightweight constructions allow us to offer a wide range of solutions while maintaining mobility without compromising stability.

We stand out by using flexible modules rather than fixed constructions. It is easy to assemble, no element weighs more than 12 kg and it is easy to expand and replace elements as needed. Should a part be lost or damaged, it is easy and fast for us to deliver a replacement.

G-Rack bars are ideal for high-end events, wedding venues, private events, receptions at restaurants, both indoors and outdoors - no matter if it's a nice reception desk, tailored branded trade fair stand or 50 meter bar or catering solution.

Sustainability is an absolute priority for us. That is why our modules are made from 60% recycled material, while being robust and durable.

Take the first step towards a sustainable and flexible solution. Choose G-Rack and let us help you create a usable and mobile setup that impresses both you and your guests.

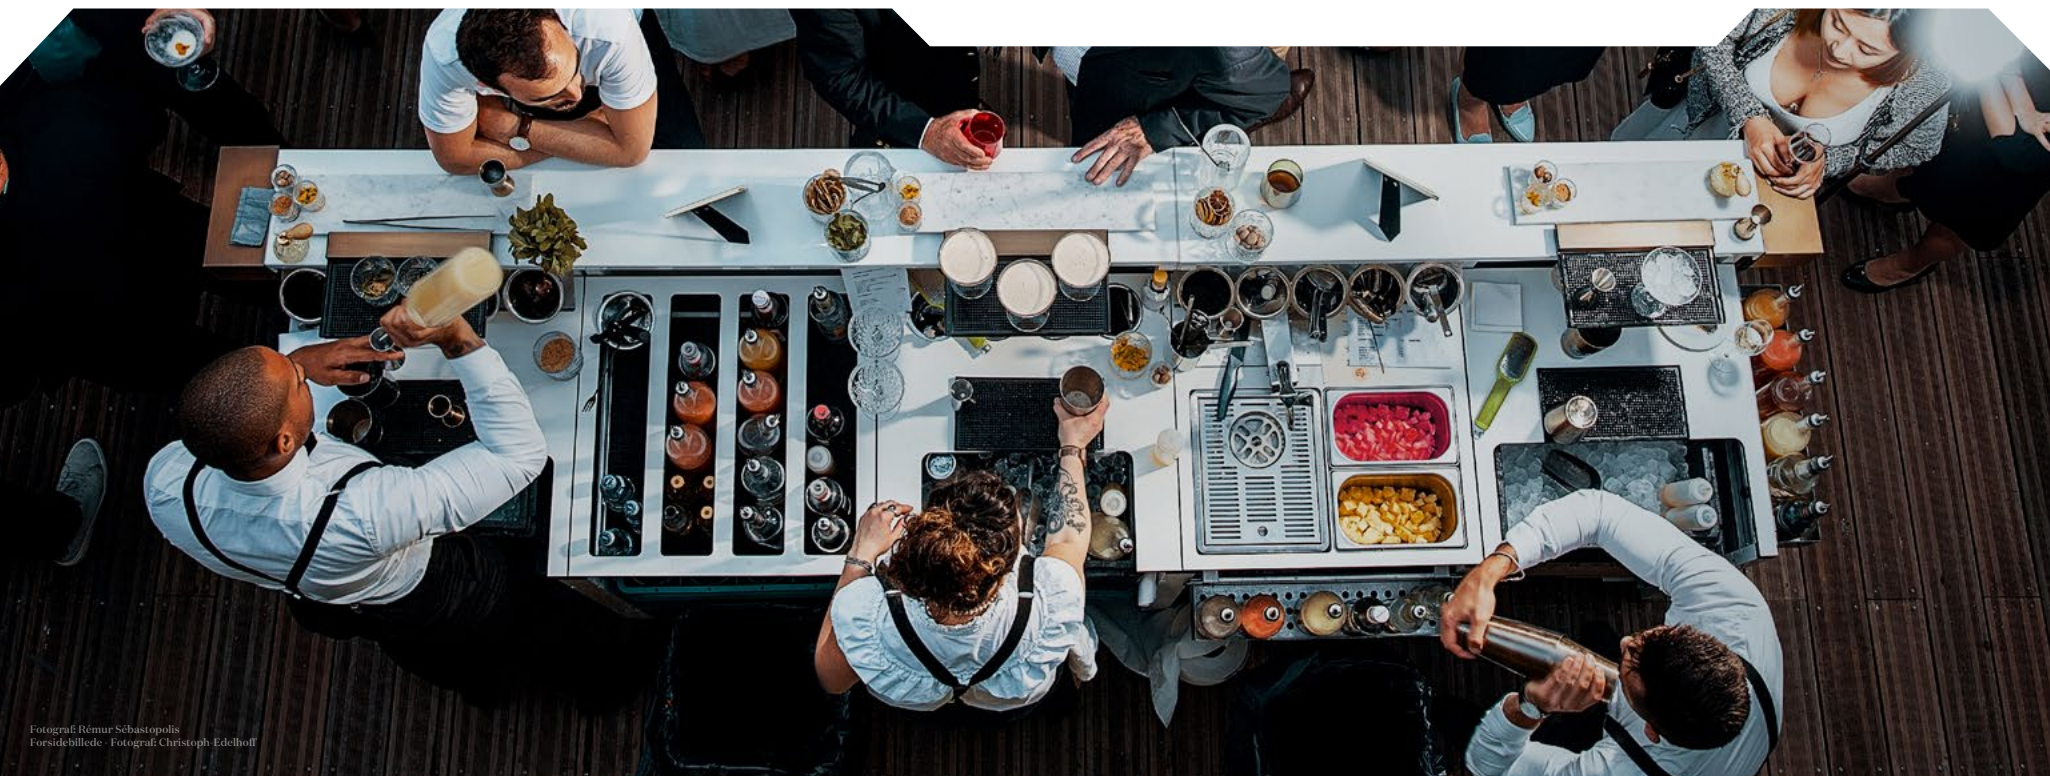

Visit g-rack.dk and let yourself be inspired even more. We are also ready to design a customized solution with 3D mock-up to suit your specific needs.
